

## XBore Portable Line Boring Machine

A precision heavy duty and portable line boring machine for stern tubes, rudder bores, track pad , bucket excavator, hinge pins, gearboxes, turbines and many more applications.

Diameter Range: 30.0 - 50.0 mm Stroke: 300.0 - 600.0mm Max Bar Length: 60.0 - 295.0 .

This line boring machine is more compact and affordable version of line boring machine, with the mounting flexibility needed for work in restrictive spaces. A variety of motor and bar options add power to this outstanding value.

### Features

- Electric 2.2 kW or hydraulic power drive (XBore Heavy)
- High torque transfer with smooth power delivery
- Heavy duty capability over 425 N.m of torque at bar
- Capable of cutting all materials
- Quick set up with modular components
